

# Powered by ambition.

Introducing the new Siemens oven range.

Siemens Home Appliances

**SIEMENS**

# The kitchen has always been about connecting

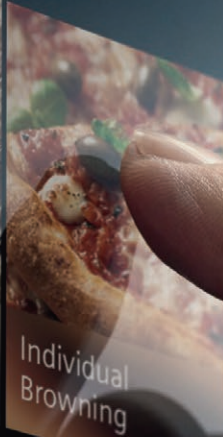

Ever since we gathered around a fire, cooking has been about connecting. Today, even more so. The kitchen has opened up: architecturally, culturally and technologically. It has become the social hub of life. That's why the Siemens kitchen is all about connecting. Connecting an oven so you don't have to stand by to see what's going on in it. Connecting to the endless possibilities of the smart home so that you can connect to the important things in life.

# Outstanding design that always matches your taste

# Get in touch with the unique interface and its extensive menu.

## Intuitive by design: The TFT-Touchdisplay.

Intuitively designed with a high-resolution TFT-Touchdisplay, the oven's menu offers easy navigation through a high-contrast color screen. Access all features with a simple touch, including a variety of programmed dishes even when cooking without a recipe, all tailored to your taste.

# Designed to look as smart as it is

## Beauty, built into your everyday life.

Seamlessly integrated into your daily life. The studioLine and iQ700 oven offers not only intelligence but also unmatched design. Its precise alignment of edges, curves, and dimensions adds both elegance and convenience to your everyday experience, appealing to your senses and pleasing your taste.

The passion for detail  
becomes visible on  
the outside.

# Intelligently connected Beautifully designed

Intelligence in material and design. Its high-quality glass door retains heat and enhances the oven's aesthetics. The studioLine oven handle remains hidden from the front view, providing a sturdy grip when opening and closing the oven door.

THE NEW STUDIOLINE OVEN RANGE

studioLine

The world's most  
exclusive built-in  
range, brought to  
you by Siemens  
Home Appliances.

**coffeeWorld**

Swipe through a wide range of international coffee.

**aromaSelect**

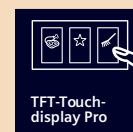

Choose between three different aroma types, according to your taste.

**One-touch preparation**

Enjoy your favourite coffee speciality the easy way thanks to the oneTouch function.

**Favourites**

With Favorites, you can save individual preferences for coffee and milk specialties and create up to 30 favorites with individual names.

**TFT-Touchdisplay Pro**

A user-friendly menu, slide-touch navigation and large colour display allows you to operate your espresso machine easily and comfortably.

### Keep in touch until dinner.

The touch screen enables program adjustments and notifies you about preheating, which can be accelerated with a touch. The oven automatically turns off when the program finishes, serving your dish right on time.

# An innovative user journey: Effortlessly beautiful

### It's cooking in high resolution.

The beautiful contrasts and colours of the display connect the design standards to the high functionality of the oven. With the clear images of all pre-installed dishes, browning levels and instructions cooking becomes even more intuitive and enjoyable.

**On a scale from one to five: Choose your favourite level of crunch.**

Select your desired browning level on a scale from one to five with the StudioLine (HN978GQB1) oven's Individual Browning feature. It provides five browning options, monitored by the built-in camera as your food bakes. Once your dish is done, the oven turns off and notifies you when your chosen browning level is achieved, ensuring your favorite food is cooked just the way you like it.

Prepare what  
you prefer

Serve and enjoy your favourite food according to your personal taste.

# Not even the basics are basic

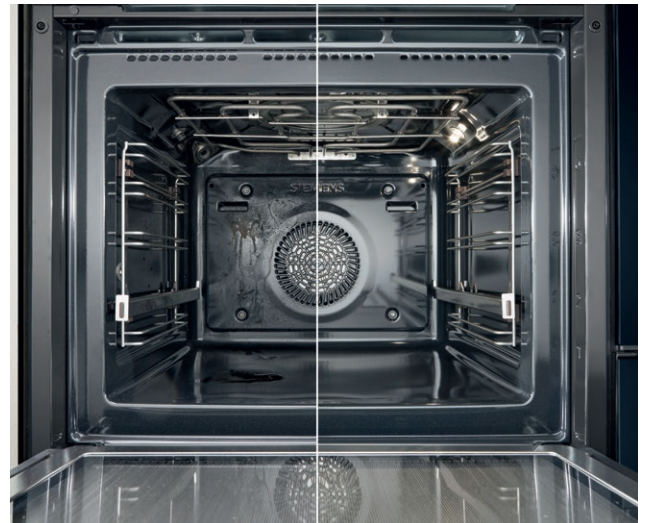

Beyond its smart capabilities, the iQ700 oven excels universally. Its varioClip Rails Plus bring flexibility, allowing telescopic rails to be mounted at various heights, including grill level, for optimal dish placement. The full-extension rail system enhances safe loading and unloading.

» Everything you expect from an oven and everything you did not even think of.

**activeClean: Connect to all-new. Again and again.**

After all the baking and cooking, activeClean ensures that your oven gets back into its brightly polished condition by using pyrolysis technology: high heat turns dirt into ashes. All it takes for you is a touch of your finger and a sponge to clean it up. Thanks to activeClean you never need to scrub your oven again.

Please note that the different features and functions depend on the chosen oven model.

### Choose the model that fits you and your needs

The new iQ700 oven offers various models, each equipped with distinct smart features or essential functions. All models boast beautiful design, although feature compatibility varies based on size. Choose between the standard 60 x 60 cm or the compact 60 x 45 cm oven with microwave function. Your preferences determine features like Individual Browning, microwave, steam, or self-cleaning.

### Everything becomes brighter.

#### Thanks to dualLED

Whatever is happening inside your oven will be perfectly illuminated by two modern and energy-efficient LED lights, the dualLED.

### Everything becomes tender.

#### Thanks to fullSteam Plus.

The new iQ700 oven's steam function offers both healthier and quicker cooking. By skillfully blending steam and 120°C heat, dishes are done about 20% faster compared to the standard 100°C. Fresh colors of vegetables are maintained, along with essential vitamins. Even robust vegetables turn tender, making fullSteam Plus a convenient method for delicious, nutritious meals.

» Connect to satisfying results,  
whatever is on the menu.

# Multiple talents. All aligned in one unique design

## Combine whatever you require.

The Siemens cavity series redefines your kitchen perception as well as your cooking experience. Choose from a wide range of appliances: Starting with the new oven models in different dimensions like the compact oven and combine variable

features. Going over to coffee making with the built-in espresso machine – beautiful and functional at once. And after all, the innovative solutions of the warming drawer find their space on the bottom of your built-in combination. Experience how exceptional technology, pioneering

built-in solutions and elegant design are tailored to your kitchen. It makes no difference whether they are alone or combined, side by side or on top of each other – the big picture never fails to impress. Not even down to the smallest detail.

## » What belongs together, fits together.

### Intelligently connected. Beautifully combined.

That is design and function. You decide which function your arrangement should fulfil best. Siemens kitchen appliances meet all the requirements. Cook your dishes to perfection in your smart oven or compact oven – and keep them warm in the warming drawer. Or serve them directly on preheated plates.

### Down to the smallest detail.

Premium materials, like quality glass and steel, stir the senses with their colour and texture. In addition, the TFT-Touchdisplay in all value classes is clean and discreet when turned off. When in use, its design is as clear as the lines of our appliances – and its functions as clear to understand.

### Either way. Your way.

There are no limits to your creativity when it comes to creating exactly the look you desire. And fulfilling all your needs. Thanks to many technical solutions that Siemens has to offer, the possibilities of arranging your appliances are highly flexible. How about a coffee from your built-in coffee machine while waiting for a perfect meal from your oven?
